## **Hiring Manager**

Brightly Software

### **Subject: Application for Software Engineer – Intern (+PPO)**

Dear Hiring Manager,

I am writing to express my interest in the Software Engineer – Intern (+PPO) position at Brightly Software. As a Class 11 student and active developer with hands-on internship experience in Artificial Intelligence and Web Development, I have consistently demonstrated the ability to learn fast, build efficiently, and deliver real-world solutions.

During my internships at Syntecxhub (AI Intern), Codec Technologies (AI Intern), and currently at Amdox Technologies (Web Developer Intern – Paid), I have worked on AI-integrated systems, full-stack applications, and production-ready web solutions. I have completed 18+ industry-recognized certifications and built multiple deployed projects using React, Next.js, Tailwind CSS, and modern backend architectures.

What sets me apart is not just technical knowledge, but execution ability. I focus on clean architecture, scalable systems, performance optimization, and structured problem-solving. I actively prepare for coding rounds, strengthen DSA fundamentals, and continuously build real-world projects that reflect practical engineering skills.

I am particularly excited about this opportunity because Brightly Software represents high-impact product engineering and structured growth. I am fully committed to contributing with discipline, ownership, and technical excellence while continuing to grow as a software engineer.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and dedication can add value to your team.

Sincerely,  
Hamid Kamal
